

The background features a soft, abstract composition of overlapping shapes. A teal shape is on the left, a red shape is in the upper right, and a large pink shape is at the bottom. The text 'Shape up your space' is centered in white.

Shape up your space

## Mini Mobile

A fun folding and nesting table system. As good as fixed-frame tables when the Jewel caster breaks are engaged, as fluid as water when in motion. Mini Mobile is a highly functional table system that can fit into any project, no matter what the size.

Quickly create table formations with Mini Mobile. If you need some space, you can wheel the tables away, fold them down and nest them neatly together.

### Spaces

- Classrooms
- Libraries
- Dining areas
- Cafe areas

Not just a sum of the behavior of its parts, Mini Mobile is a product of many interactions.

## Kite®

More than a table system, Kite is a dynamic, fluid business tool. You can add tables to expand when needed, rearrange them in seconds whenever called for, efficiently store/nest them when required and even level tables on uneven floors.

When considering the elaborate interplay of mind and body, we discovered that movement is essential to learning via an awakening and activation of mental capacities. Kite is designed to adjust and move to fit into every situation, and once that situation is found, you will find the layouts naturally form socially ergonomic spaces.

### Spaces

- Classrooms
- Libraries
- Dining Areas
- Meet and training
- Events

Knowledge is learned from lots of experience. Our mobile tables allow for the creation of dynamic spaces to open up to this possibility.

## Versatilis

Any size, shape and height table (ranging from 25 to 41 inch high). Versatilis is the mobile table for every situation that gives you the hassle-free ability to create a diverse range of customized tables with one product line.

Unrivalled shape options, continuity of components and aesthetic ensures your space is fluid, creative and unified. You can even match up Versatilis as a non-folding partner to Kite, further increasing optionality.

## Balance

The Transteel mobile product line provides you with tools that can adapt to an infinity of scenarios. You can shape your space Symmetrically, and this supports the need for order and concentration. Asymmetrical layouts support creativity and spontaneity. Radial layouts are great for sharing stories and campfire style gatherings.

01 ————— Symmetrical

02 ————— Asymmetrical

03 ————— Radial

## Harmony

Thinking in terms of condensation and rarefaction is useful when trying to create harmony within your space. Thanks to the Jewel caster, it is extremely easy to create condensed spaces and then quickly shift to rarefied spaces. We use a sound wavelength to further illustrate below.

01 ————— Condensed

02 ————— Rarefied

## Social ergonomics

We all know how hard it can be to achieve well being across the board when it is such a subjective thing. This is why we bake optionality into our products, to offer users the choice to adjust accordingly at any moment to satisfy their physical and psychological needs. The very knowledge of the possibility to do this in itself increases well being, and allows an effective social ergonomics to be discovered and built from the bottom-up.
